

**Welcome to the Millard Core Knowledge
Program at Cather Elementary School!**
A Core Knowledge School of Distinction

CORE KNOWLEDGE

COHERENT

Explicit identification of what children should learn at each grade level ensures a coherent approach to building knowledge across all grade levels.

CUMULATIVE

Core Knowledge sets high expectations for all children that are achievable thanks to the cumulative, sequential way that knowledge and skills build.

CONTENT-SPECIFIC

The sequence is distinguished by its specificity. By clearly specifying important knowledge in language arts, history, geography, math, science and the fine arts, the sequence presents a practical answer to the question, "What do children need to know?"

The Millard Core Knowledge Program provides cultural literacy, sequential learning and a challenging curriculum through the following materials and content:

- E. D. Hirsch, Jr. Core Knowledge Sequence
- Spalding Phonics
- Shurley Grammar
- Into Math
- Open Court Reading Series
- Core Classic Novels – 3rd - 5th Grades
- Greek and Latin – 5th Grade
